To Whom It May Concern:

Peapod Design has designed and supervised the NCC's continuing educational course catalogs since 2002, 8 books to present plus our annual report.

The NCC continuing educational team consists of many parties and Peapod Design has managed and worked professionally with each and every person involved in the process. Peapod Design presents beautiful design options for each issue and answers the concerns of each staff member. Their fast turn around time with tight deadlines is remarkable. They go out of their way to make sure the process runs smoothly and follows through with every aspect from proofs to printing.

In closing, as detailed above, based on my experience working with Peapod Design, I strongly recommend Peapod Design for any educational projects. They have a wonderful background of clients and their expertise and professionalism is outstanding. If you would like further elaboration, feel free to call me at (203) 857-7058.

Sincerely,

David Chrzanowski  
Director, Professional Development Center
